

## Assignment 4: Group Project Initialization

1. Form your team (maximum 3–4 students) and fill in the team details in [Teams.xlsx](#)

Team name:	Responses4	
Topic name:	Complaint / Feedback Management System	
Team Members Full Name	Email	Role
Zarina Kaidaul	240905@astanait.edu.kz	Frontend&Backend
Maiya Bakytzhan	24@astanait.edu.kz	Frontend&Backend
Neila Seilkhan	240625@astanait.edu.kz	Frontend&Backend
Madina Isak	24@astanait.edu.kz	Frontend&Backend

2. Read the following documentation to understand **what Django is** and **how to create a Django project**:  
<https://tutorial.djangogirls.org/en/django/>
3. Install Django by following the official documentation:  
<https://www.djangoproject.com/>

```
File Edit Selection View Go Run Terminal Help ← → 🔍 week-3
Komandnaya stroka + ×
fra8p0@python.exe -m pip install --upgrade pip
C:\Users\zkeyd>C:\Users\zkeyd\AppData\Local\Microsoft\WindowsApps\PythonSoftwareFoundation.Python.3.12_qbz5n2kfra8p0\pyt
hon.exe -m pip install django
Defaulting to user installation because normal site-packages is not writeable

4. Choose a project topic from [Project titles.docx](#)

15. Complaint / Feedback Management System

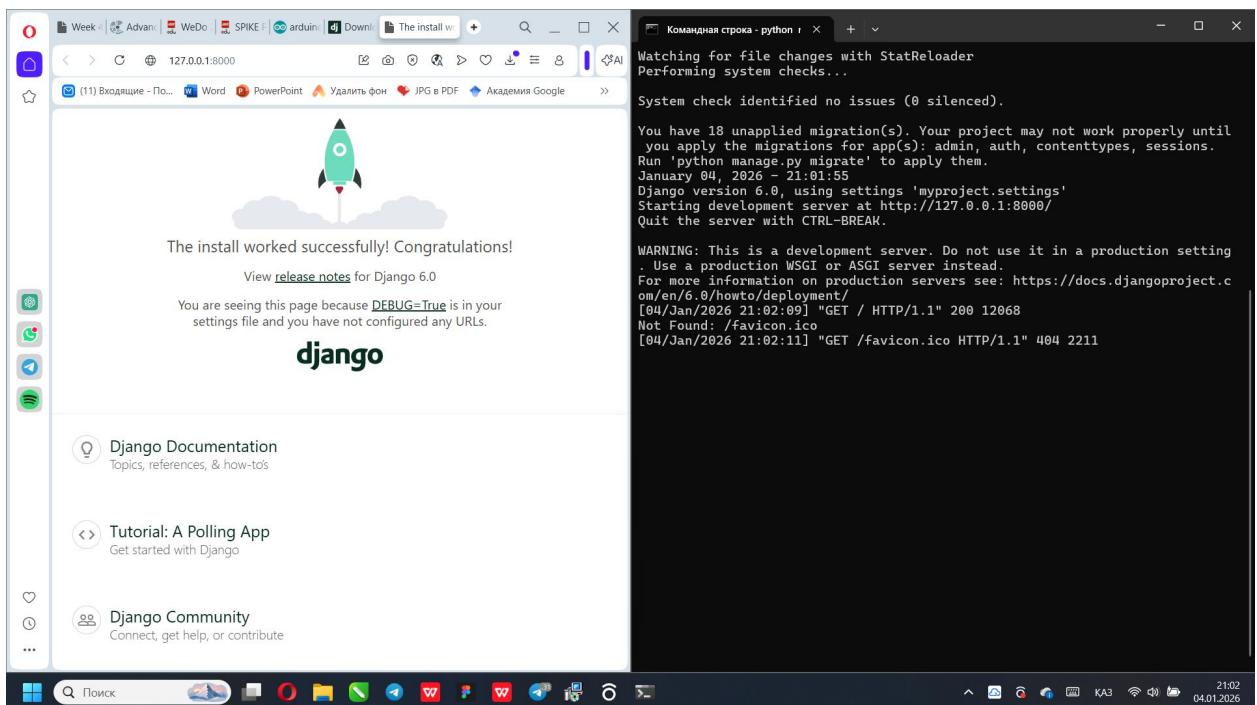

5. Create an **organization GitHub repository** for your project by following this guide:

[How to create git repository for the group project](#)

The screenshot shows the GitHub organization interface for 'Responses4'. The 'People' tab is selected. On the left, there's a sidebar with 'Organization permissions' and a list of member categories: Members (4), Outside collaborators, Pending collaborators, Invitations, Failed invitations, and Security Managers. The main content area displays four members: innakoi, madina-git, mayyab13, and Neila16. Each member has a profile picture, a link to their GitHub profile, and a note indicating they joined via 'direct assignment'. To the right of the member list, there are buttons for 'Two-factor authentication', 'Membership', and an 'Invite member' button.

6. Initialize your Django project (**run it locally on localhost**) and push the initial version to GitHub.
- If you do not yet have team members, create the repository individually.

The screenshot shows a Microsoft Visual Studio Code (VS Code) window. The left sidebar has sections for 'EXPLORER' (with files like 2-1.py, 3-2.py, etc.), 'OPEN EDITORS' (with 3-2.py selected), and 'WEEK-3' (with files like 1-1.py, 2-2.py, etc.). The main area has a terminal tab open with the following content:

```
PS C:\Users\zkayd\Desktop> cd Complaint-Feedback
PS C:\Users\zkayd\Desktop\Complaint-Feedback> python manage.py runserver
Watching for file changes with StatReloader
Performing system checks...

System check identified no issues (0 silenced).

You have 18 unapplied migration(s). Your project may not work properly until you apply the migrations for app(s): admin, auth, contenttypes, sessions.
Run 'python manage.py migrate' to apply them.
January 04, 2026 - 20:54:29
Django version 6.0, using settings 'config.settings'
Starting development server at http://127.0.0.1:8000/
Quit the server with CTRL-BREAK.
```

Below the terminal, a warning message is displayed:

**WARNING: This is a development server. Do not use it in a production setting. Use a production WSGI or ASGI server instead.**  
For more information on production servers see: <https://docs.djangoproject.com/en/6.0/howto/deployment/>

The status bar at the bottom shows: Ln 13, Col 1 (242 selected) Spaces: 4 UTF-8 CRLF { Python 3.12.10 (Microsoft Store) 04.01.2026 ENG

## 7. Upload your link to GitHub project
